

# InformaCast from Singlewire Software

## Add Mass Notification to Meraki MT Sensors

Detect Threats. Notify Everyone. Manage Incidents.

InformaCast from Singlewire Software extends the reach of Meraki MT sensor alerts to schools' connected communication devices. Text, audio, and visual alerts can be sent throughout a building or to designated groups via desk phones, desktop computers, overhead speakers and paging systems, digital signage, and mobile devices. InformaCast also serves as an incident management tool, enabling schools to gather key stakeholders via tools like Webex to assess situations and coordinate a response.

## Key Benefits

### MT Sensor Integration

Initiate InformaCast mass notifications when sensors are activated.

### Intrusive Notifications

Send text, audio, and visual alerts that grab people's attention.

### Safety Enhancements

Helps schools provide safe environments for students and staff.

### Expand Message Reach

Deliver critical information to on-site and mobile devices.

### Cost Savings

Add value to existing technology investments.

### Incident Management

Integrate with Webex to actively manage incidents as they unfold.

CISCO PARTNER CONFIDENTIAL

## InformaCast from Singlewire Software and Cisco Meraki

### Offer schools powerful solutions for safety and communication

This integration helps schools with several safety and operational issues, including knowing when doors have been left open, detecting if a student or visitor is vaping on school grounds, or helping teachers request assistance should they need it. InformaCast can then help expand the reach of these alerts with text, audio, and visual messages delivered throughout a school or to targeted personnel. Together, InformaCast and Meraki MT Sensors provide schools with a powerful solution for enhancing safety and communication.

#### Integrate with MT Sensors and More

##### Enhance Threat Detection

Know the moment an incident occurs with InformaCast integrated with MT Sensors.

##### Expand Message Reach

Deliver intrusive text, audio, and visual notifications to Cisco phones, IP speakers, desktops and more.

#### Detect Threats. Notify Everyone. Manage Incidents.

##### Actively Manage Incidents

Integrate InformaCast with Cisco Webex to collaborate and manage incidents in real-time.

##### Create a Safer Learning Environment

Better protect students and staff with enhanced threat detection and notification capabilities.
