Safety Manager Tipline

Greater visibility into potential threats helps schools act sooner. Safety Manager from Singlewire Software includes a built-in tipline that allows students, staff, and families to share safety concerns with school leaders or resource officers— anonymously or with contact details—creating a trusted, accessible way to prevent incidents before they escalate.

Address Any Concern

Choose from a wide range of potential concerns and events to submit tips for any situation that may arise.

Location-Specific Tips

Create dedicated URLs and QR codes for specific schools or buildings to submit tips that provide direct insight into where potential threats may occur.

Multiple Submission Options

Submit tips anonymously, with contact details, or through the software to allow conversation between school leaders and the submitter without disclosing contact information.

The smartphone screen displays the Visitor Aware app interface. At the top is the Visitor Aware logo. Below it, the text reads: "Submit An Anonymous Tip Report to Visitor Aware Office". A sub-header states: "To make an anonymous report, complete the form below." The form is titled "1 Description" and includes three fields: a text area for "* Event Description: (Including... Who, What, When, Where and How Do You Know)", a dropdown menu for "* Concern / Event Types", and a field for "* What time and date did the event occur to".
