

## ASSISTED LIVING VISITOR CHECK-IN

Safety starts at the front door. Visitor Aware provides the tools to screen visitors so your facility can identify threats before they gain access to sensitive areas. Provide peace of mind with a comprehensive tool that verifies visitors and confirms a resident relationship exists, so you know the people in your facility have permission to be there. Using technology you already own you can create a secure environment that makes it evident from the moment someone enters your facility that safety is a top priority.

## DISCOVER THE VISITOR AWARE DIFFERENCE

Not all management solutions are created equal. See what sets Visitor Aware apart from the competition:

- **Encrypted facial recognition** results in fewer false positives
- **No proprietary hardware** means you save money by using tools you already own
- **Multi-site insights** enable you to access visitor check-in information from any building within your network
- **QR codes and preregistration links** save time and hassle and help identify and verify visitors with ease
- **Mass notification and incident management compatibility** with our InformaCast software
- **Resident relationships** help verify authorized visitors before granting access
